

CLINICAL RESEARCH MANAGEMENT, INC.

YOUR PARTNER FOR CLINICAL RESEARCH

OUR MISSION

To serve our customers' clinical research needs with *quality*, *value*, and *integrity*.

" Our primary goal is to successfully meet the ever changing needs of our customer. We offer integrity, flexibility, responsibility, value, and a commitment to excellence for our customers and staff.

This is what makes us unique."

~ Victoria Tifft, President

WHO WE ARE...

Clinical Research Management, Inc. is a full service Contract Research Organization serving our customers since 1992.

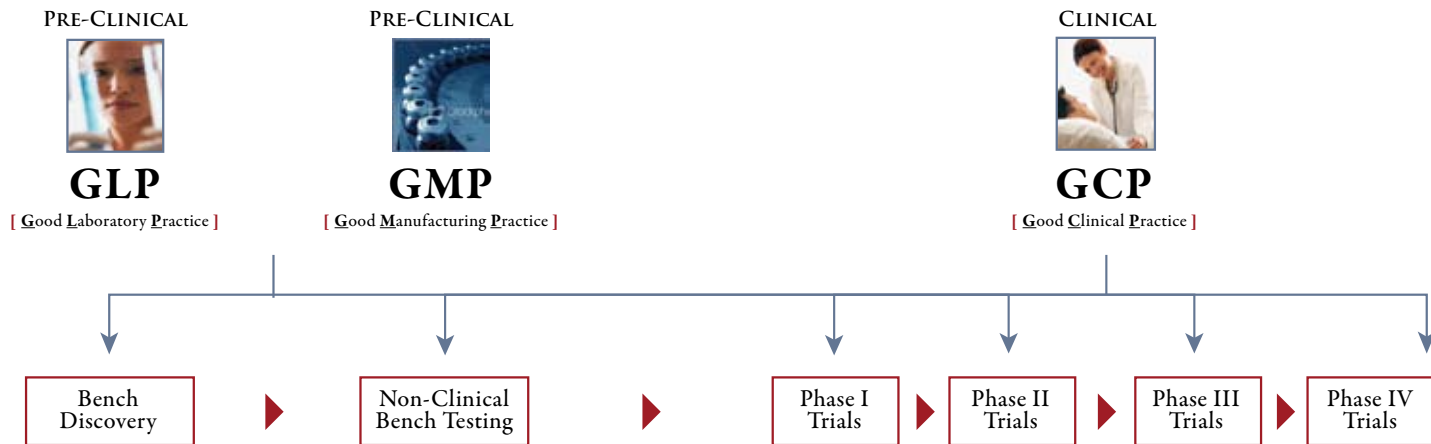

Clinical Research Management, Inc. (CRM) is a woman-owned, full service Contract Research Organization (CRO) that has been supporting clinical research activities sponsored by the government, academia, biotechnology, and pharmaceutical industries since 1992.

We provide flexible, tailored, high-quality, full spectrum Concept-to-Bedside solutions customized to meet our customers' specific and ever-changing needs.

We support research around the globe from our corporate offices in Hinckley, Ohio and our regional offices in the Washington, DC metro area.

" ... CRM has been, and still is, a first class organization that cares about their customer base and at the same time looks out for the employees under them. "

" ... CRM has demonstrated some of the most comprehensive monitoring we have experienced. The representatives are friendly and professional ... They work with the investigators and site personnel, providing training and feedback as needed. Last, but not least, they provide comprehensive reports in a timely, useful manner. "

WHY CRM?

CRM has proven to be an effective partner in providing clinical research solutions that contribute significant value to our customer's programs.

" ... I just wanted to say thank you on behalf of our entire team here for a well organized site qualification and study initiation visit. We particularly appreciate the collaborative approach and look forward to working together with your team in the weeks and months ahead. "

Our philosophy is to support clinical research by having the required expertise and understanding the needs of our customers. We respond rapidly and comprehensively to requests, enabling us to deliver quality results consistently and efficiently.

We offer ideas and solutions that achieve the stated goals of your project and are committed to keeping costs down and accelerating your product to market.

CRM places an emphasis on communication at all levels and providing a high level of attention, dedication, and flexibility to each of our projects.

CRM has an experienced staff of 300+ multi-disciplinary professionals. Our diverse team includes clinical research experts who have proven backgrounds in government, academia, and industry-managed clinical trials.

We have continuously been recognized for successfully managing clinical research programs on time and within budget.

CRM has steadily grown through a combination of organic referrals and new growth by offering our customers best value solutions.

Our approach to “Do the Right Thing” is genuine and is a reflection of our ability to help our customers achieve their goals. This interest and caring attitude is evidenced by consistent communication and interaction between our staff and clients, and includes involvement from the highest levels of our organization.

Our President, Victoria Tiff, and the other members of her senior management team are easily accessible to clients and staff. This attentive and streamlined accessibility allows CRM to make decisions quickly and efficiently. The benefits to the customer are realized in reduced lag time for decisions and a streamlined, accessible management team.

We provide our customers with solutions that enable them to achieve success!

Our success is measured by the long-term relationships we have with our customers and the outstanding ratings we continue to receive from them.
